

The first and only fully integrated **rapid response vehicle.**

First Base™ is made possible by Real Power™ technology, the world's first fully integrated AC power generation system for trucks (patent #s 6,979,913 and 7,057,303). The technology that turns trucks into mobile power stations comes from Contour Hardening, Inc., headquartered in Indianapolis, Indiana and well-known in the automotive and performance-driven racing industries for its proprietary technology.

To find out more about First Base, Real Power technology, and Contour Hardening, Inc., please visit [www.realacpower.com](http://www.realacpower.com) or call **(877) 670-7325**.

The first and only fully integrated **rapid response vehicle.**

# The first and only fully integrated rapid response vehicle.

## Standard Features

Everything pictured here may be ordered on each First Base™ vehicle. Other vehicle makes, models, configurations, and options are also available and may be designed to accommodate a wide range of needs.

## 15kW Real Power™ GENERATOR

- 15,000 watts of continuous power w/ 120 and 240 volt outlets
- Mounted under bed between frame rails allowing for maximum use of bed and storage space
- Uses truck's engine power and transmission PTO gear to drive the system
- Complete integration with truck's factory installed engine controls

**ICE/FOOD/MEDICINE STORAGE**

- 25 cu. ft. freezer
- 3,000 watt inverter for mobile operation

**ALL-WEATHER MOBILE SHELTER**

- 21' x 32' all-weather expedition-grade tent
- 3.5 ton HVAC, interior lighting, and electrical outlets
- Bed-mounted tent containment/transportation system utilizes tent frame as secure bed rails

**WATER**

- Storage space for up to 140 - 2.5 gallon containers (350 gallons)
- Reclaimed condensate from AC held in 20 gallon underbed tank for wash water

**FUEL**

- 300 gallons of diesel fuel storage capacity
- Allows for nearly 2 weeks of continuous run-time without re-fueling

## What is First Base™?

**First Base™** is a fully integrated, secure, rapid-response vehicle and mobile power station. As a first response vehicle, it has the power and payload to house, feed, sleep and care for 30 people in the field for up to two weeks. The same features that make First Base such a valuable disaster relief resource also make it ideal for construction sites, insurance field agents, and catering businesses. The vehicle's comprehensive and compact nature decreases the amount of time and personnel required for coordination, set-up, asset management, and delivery.

**FORD™ or International™ CAB FORWARD DIESEL LCF/CF™**

- 4.5L Diesel Powerstroke
- Automatic transmission with PTO provision

**DIAMOND PLATE ALUMINUM BED**

- Lightweight yet very strong, allowing for maximum use of vehicle weight rating
- Perimeter lighting
- Multiple anchor points

**FOOD** • Storage space for up to 1500 lbs of food

**SAFETY & SECURITY**

- Carlon Damp and Wet double switch for frame-mounted lights
- Keyed wheel lock
- Emergency stop buttons on bed
- Lockable storage compartments and freezer chest

**DIAMOND PLATE UNDERBED STORAGE COMPARTMENTS**

*Storage compartments can be customized to add the following:*

- First Aid supplies
- Eating and cooking utensils
- Maintenance items
- Clothing and blankets
